

# STABILOY® MC Feeder Cable: Rhino Rugged

Alcan Cable's STABILOY® MC Feeder Cable takes its clues from nature. STABILOY MC Feeder Cable is engineered to include all of the exceptional characteristics of a pipe and wire installation, but in one rough and rugged assembly. Our STABILOY MC Feeder Cables aren't just simple, they save contractors time, money and energy on the job site. Check out STABILOY MC Feeder Cable's distinctive features and find out how Alcan Cable is taking clues from nature to engineer the best solutions for today's building construction professionals.

#### *Rhinoceros: Distinctive Features*

Strong, tough hide that acts like armor	Strong, lightweight aluminum armor
Incredibly agile, can make tight turns in a small space	Conduit is stronger than MC cable but MC cable is more flexible
Adaptable to various habitats	MC Feeder with PVC Jacket can be used as temporary power and can be exposed to the elements
Loves to wallow in mud and watering holes	MC Feeder with PVC Jacket can be direct buried and is safe for installations in wet areas
Can reach speeds of 30 miles an hour	Quick and easy to install ... in just one step
Is found throughout Africa	MC Feeder has gained in popularity and is available from stock to all 50 states
Designed by Mother Nature	Designed to save you time and money
Eco-friendly (loves grass and leaves)	Eco-friendly (free of heavy metals*, lead* and cadmium*)
